

## **REMARKS**

The present Preliminary Amendment is submitted with the Continuation Application enclosed herewith. The Continuation Application is based on and claims the priority of US Patent Application No. 10/021,724, filed December 12, 2001, which is based on and claims priority of provisional application number 60/261,752, filed January 16, 2001, provisional application number 60/286,155, filed April 24, 2001, and provisional application number 60/296,042, filed June 5, 2001.

In the Preliminary Amendment, claims 1-28 and 37-42 have been canceled without prejudice, and new claims 43-79 have been added. Accordingly, upon entry of these amendments, claims 29-36 and 43-79 will be pending in the present application. The amendments should be made before calculating the filing fee.

All claim amendments are fully supported throughout the specification and figures. For example, the Examiner's attention is directed to paragraphs 58 and 81-103 of the specification along with the associated figures. However, support for the new claims, as well as the remaining original claims, is provided throughout the specification. No new matter has been added.

The pending claims are believed to be in condition for allowance. However, if the Examiner believes certain amendments are necessary to clarify the present claims or if the Examiner wishes to resolve other issues by way of a telephone conference, the Examiner is kindly invited to contact the undersigned attorney at the telephone number indicated below.

Respectfully submitted,

Date: February 11, 2004
